Dear Truck Owner/Operator:

Our records indicate that your vehicle, vehicle identification number (VIN) «VIN», engine serial number (ESN) «ESN», has an engine eligible for the installation of Low oxides of nitrogen (NOx) Software and has not yet had this software installed. Please contact one of the authorized dealers on the enclosed list to have the software installed. Installation of this software on eligible vehicles is required by a California Air Resources Board (ARB) regulation effective March 21, 2005. Manufacturers will work with their authorized dealers to install the Low NOx Software at no charge.

The ARB is beginning implementation of the Low NOx Software Upgrade regulatory program and will be conducting vehicle inspections in conjunction with the roadside smoke inspection program. Software installation is required by the dates listed in the table below for your model year engine. ARB has, at times, issued warnings in lieu of citations during the initial stages of regulatory implementation. Due to the short interval between regulatory adoption and the first deadline – April 30, 2005 for 1993 and 1994 engines – ARB enforcement personnel will begin program implementation and vehicle inspections, but will not issue citations with penalties before June 30, 2005.

Table 1 Required Installation Dates for Low NOx Rebuild Kit

Engine Model Year	Required Installation Date for Low NOx Rebuild Kit
1993 and 1994	April 30, 2005*
1995 and 1996	August 31, 2005
1997 and 1998 other than MHDDE	December 31, 2005
1997 and 1998 MHDDE	December 31, 2006

*Citations will not be issued until June 30, 2005

If you have already had Low NOx Software installed in this vehicle, you received this notice in error and may disregard it. Citations of noncompliance will only be issued based on vehicle inspections.

The energy challenge facing California is real. Every Californian needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our Website: <http://www.arb.ca.gov>.

California Environmental Protection Agency

Printed on Recycled Paper

Truck Owner/Operator

Page 2

If you no longer own this vehicle or it is no longer operational, you may disregard this notice.

In the event that this letter does not have your engine serial number (ESN) listed, please provide the ESN and return this page to us so we can update our records.

VIN «VIN» ESN «ESN» _____

Mail to: Air Resources Board, P. O. Box 2815, Sacramento, California 95814,
Attn: Lisa Jennings or Fax to: (916) 322-3923.

Low NOx Software is a programming upgrade to the electronic control module (ECM) in your electronically controlled engine. The Low NOx Software reduces emissions of NOx, which is an invisible gas that forms smog and contributes to slower lung growth in children. California needs the emission reductions from installing the low NOx engine software to reduce pollution and keep our federal highway funding.

More than 90,000 vehicles have already had the low NOx engine software installed nationwide with no significant change in driveability, safety, or fuel economy. The regulation requires authorized dealers to install the low NOx engine software on eligible vehicles free of charge upon your request. Under this regulation, truck owners that do not comply with this engine software upgrade by the required installation date will be subject to enforcement penalties.

You may have heard that four engine manufacturers (Caterpillar, Cummins, Mack/Renault, and Volvo) filed a motion for a preliminary injunction against the approved regulation. The judge has denied the motion for preliminary injunction and ARB is moving forward with immediate implementation of the regulation.

Thank you for taking the time to read this letter and for doing your part to maintain clean air for the people of our State.

Sincerely,

Catherine Witherspoon

Catherine Witherspoon
Executive Officer

Estimado Propietario/Operador de Camión:

Nuestros archivos indican que el motor de su vehículo, número de identificación vehicular (VIN) «VIN», con motor número de serie (ESN) «ESN», puede ser reprogramado con software para reducir las emisiones de óxidos de nitrógeno (NOx), conocido como “Low NOx Software”, y que este software no ha sido instalado todavía. Por favor llame a uno de los concesionarios autorizados que se incluyen en la lista adjunta. La instalación de este software es obligatoria bajo un reglamento del Consejo de Recursos de Aire de California (ARB) que entró en vigor el 21 de Marzo de 2005. Los fabricantes de motores trabajarán con sus concesionarios autorizados para instalar el software “Low NOx” sin costo.

El ARB está iniciando la implementación del programa obligatorio de reprogramación con software “Low NOx” y realizará inspecciones conjuntas con el programa de inspección de emisiones de humo en las carreteras. La instalación del software se debe realizar para la fecha correspondiente al año del modelo de su motor en la tabla de abajo. En ocasiones, el ARB ha optado por emitir amonestaciones en vez de multas durante la etapa inicial de implementación de un reglamento. Debido al corto plazo entre la adopción de este reglamento y la primera fecha límite – 30 de Abril de 2005 para los motores modelo 1993 y 1994 – los inspectores del ARB iniciarán la implementación del programa de inspección, pero no impondrán multas antes del 30 de Junio de 2005.

Tabla 2 Fechas Límite para Cumplir con la Instalación del Software “Low NOx”

Año del Modelo del Motor	Fecha de Cumplimiento
1993 y 1994	30 de Abril de 2005*
1995 y 1996	31 de Agosto de 2005
1997 y 1998 que no sean MHDDE**	31 de Diciembre de 2005
1997 y 1998 MHDDE	31 de Diciembre de 2006

*No se impondrán multas hasta el 30 de Junio de 2005

**MHDDE = Motor diesel de uso mediano-pesado

Si usted ya cumplió con la instalación del software “Low NOx”, este aviso le fué enviado por error y lo puede ignorar. Las multas por incumplimiento estarán basadas solamente en inspecciones vehiculares.

The energy challenge facing California is real. Every Californian needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our Website: <http://www.arb.ca.gov>.

Printed on Recycled Paper

Propietario/Operador de Camión

Página 2

Si ya no es dueño de este vehículo, o si no está en funcionamiento, puede ignorar este aviso.

En caso de que el aviso no incluya el número de serie (ESN) de su motor, agradeceríamos que nos proporcionara este dato para actualizar nuestros archivos.

VIN «VIN» ESN «ESN» _____

Por favor envíe esta página por correo a: Air Resources Board, P. O. Box 2815, Sacramento, California 95814, Attn: Lisa Jennings, o por Fax al (916) 322-3923.

La actualización con software “Low NOx” consiste en la reprogramación del módulo de control electrónico (ECM) del motor. El software “Low NOx” reduce las emisiones de NOx, el cual es un gas invisible que contribuye a la formación de smog y dificulta el desarrollo pulmonar en los niños. California necesita de la reducción de emisiones que resultará de la instalación del software “Low NOx” para combatir la contaminación y mantener el nivel de ingresos de fondos federales para carreteras.

El software “Low NOx” se ha instalado en más de 90,000 vehículos en todo el país sin causar cambios notables en su funcionamiento, seguridad, o economía de combustible. El reglamento obliga a los concesionarios autorizados a instalar el software, sin costo, en los vehículos que reunan los requisitos cuando usted lo solicite. Bajo este reglamento, los dueños de camiones que no cumplan con la instalación del software quedarán sujetos a multas.

Quizá haya escuchado que cuatro de los fabricantes de motores (Caterpillar, Cummins, Mack/Renault, y Volvo) solicitaron una orden de suspensión provisional del reglamento. El tribunal rechazó la moción y el ARB está procediendo con la implementación inmediata.

Gracias por tomarse el tiempo de leer este aviso y por contribuir a mantener limpio el aire para los habitantes de nuestro Estado.

Sinceramente,

Catherine Witherspoon
Executive Officer

2. Lista de Concesionarios Autorizados por Área Geográfica

Questions and Answers

How do I tell if my engines are affected?

Most 1993-1998 heavy-duty diesel engines are affected. Check the engine manufacturer and engine model in your truck if you have a 1993-1998 model year, electronically-controlled, engine. Compare your engine manufacturer and model with the attached List of Low NOx Rebuild Engines. If you find your engine on the list, low NOx engine software is available for your engine. Your service outlet may be contacted to determine whether or not your engine is eligible or has already been reprogrammed with low NOx engine software. Some 1998 model year engines that must also get the software are in 1999 model year vehicles.

What happens if I don't get the low NOx engine software installed on my vehicle?

Installation of the low NOx engine software is required by the implementation date shown in Table 1 of the attached letter. If you do not comply with the regulation, you may be cited and required to demonstrate compliance within 45 days and subject to a civil penalty of \$300.

How will it affect my engine performance or fuel economy?

Manufacturers have stated that low NOx software will not affect the driveability or the safety of your vehicle. Several fleets have had the low NOx software installed prior to rebuild and have reported no noticeable differences in their fuel use. We expect the average fuel economy penalty, if any, to be below one percent.

How long will the installation of the low NOx engine software take?

The low NOx engine software takes about 15 to 30 minutes to install on your vehicle. You may need to allow additional time for driving to and from the authorized dealer facility. There may also be wait time, which could be reduced or eliminated by scheduling your visit.

How do I get the software installed?

Manufacturers will work with their authorized dealers to install the low NOx software at no charge. Call your local, authorized dealer and make an appointment to get the low NOx software installed. If you have trouble locating a dealer that can install the software, call Lisa Jennings at (916) 322-6913, at ARB, for help in locating an authorized dealer.

What if I have more questions?

You can contact ARB by phone or by mail, or search our website: www.arb.ca.gov
Low NOx software webpage: www.arb.ca.gov/msprog/hdsoftware/hdsoftware.htm

Fax Number: (916) 322-3923

Preguntas y Respuestas

¿Cómo puedo determinar si mi motor será afectado?

La mayoría de los motores diesel de servicio pesado modelos 1993-1998 serán afectados. Si usted tiene un camión modelo 1993-1998 con motor de control electrónico, identifique el fabricante y modelo del motor. Compare el fabricante y modelo de su motor con la lista adjunta. Si está en la lista, existe software "Low NOx" para su motor. Tambien puede comunicarse con su estación de servicio para determinar si su motor reune los requisitos o si ya ha sido reprogramado con software "Low NOx". Algunos motores modelo 1998 fueron instalados en vehículos modelo 1999, y estos también deben recibir el software.

¿Qué sucede si no instalo el software "Low NOx" en mi vehículo?

La instalación del software "Low NOx" debe completarse para la fecha indicada en la Tabla 1 de la carta adjunta. De no cumplir con el reglamento, se le puede extender una infracción exigiendo que demuestre cumplimiento en los próximos 45 días, y podría estar sujeto a una multa de \$300.

¿Cómo afectará el funcionamiento de mi motor o la economía de combustible?

Los fabricantes de motores afirman que el software "Low NOx" no afectará el funcionamiento o la seguridad de su vehículo. Varias flotas de camiones han sido reprogramadas antes de la reconstrucción del motor, y no se ha reportado diferencia considerable en el uso de combustible. Se anticipa que cualquier pérdida en la economía de combustible, si es que la hubiera, sería menor del uno por ciento.

¿Cuánto tiempo tomará la instalación del software?

La instalación del software en su vehículo tomará de 15 a 30 minutos, aparte del tiempo que le tome viajar al centro de servicio autorizado. Tambien es posible que le toque esperar, pero puede minimizar o eliminar el tiempo de espera si hace una cita.

¿Cómo puedo obtener la instalación del software?

Los fabricantes de motores colaborarán con sus concesionarios autorizados para instalar el software gratis. Llame a su concesionario autorizado local y haga una cita para instalar el software "Low NOx". Si necesita asistencia en Español para localizar un concesionario autorizado, puede llamar a Marivel De La Torre del ARB al (916) 323-1362.

¿Que puedo hacer si tengo más preguntas?

Puede comunicarse al ARB por teléfono o correo, o visite nuestra página en la Red:
